AN EXTRACT.

Of no use are the men who study to do exactly as was done before, who can never understand that today is a new day. We want men of original perception and original action, who can open their eyes wider than to a nationality—namely, to considerations of benefits to the human race—can act in the interest of civilization, men of elastic, men of moral, mind, who can live in the moment and take a step forward.—Emerson.

It is now believed that the backwater in the Elephant Butte dam will cause seepage for several miles above the northern end of impounded water, as it is doing for the land below. No one has yet come to the front with a proposition to drain the upper valley expected to be effected.

Recently a number of New Mexicans were arrested and fined for hunting treasure in what is called a "national monument," which is an invention supposed to save the old ruins to posterity, but which is actually for the purpose of furnishing a job for the man in charge. Also, the right to hunt treasures is reserved to the men boasting the game.

The first quota of the New Mexico draft is now in training and will soon be in France, or somewhere. This drives home the hardships of war, because parents are sending their sons, wives their husbands and most girls their sweethearts. Those at home now have it up to them to see that the boys at the front are fully supplied with the food and munitions necessary to win with as little loss of life as possible.
